DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 8, 9, 11-13 and 16-18 are rejected under 35 U.S.C. 102(b) as being clearly anticipated Tseng, et al. (US 6,397,736). The features of the instantly rejected claims are structurally met by the reference.

Allowable Subject Matter

Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 19 and 20 are allowable over the prior art of record.

Response to Arguments

Applicant's arguments filed October 13, 2004 have been fully considered but they are not persuasive. Applicant states that "claim 1 originally recited that the first group of blades consisted of two blades located on opposite sides of the central circular region. This clearly distinguished over the cited Tseng patent which discloses four such blades..." However, even though the patent to Tseng discloses four blades, two of the blades as recited in the claims clearly read on two of the blades shown in Fig. 3 of the Tseng reference. Furthermore, Tseng teaches that the two blades are diametrically across one side of the central region and terminate substantially at the center thereof, while the other blade extends diametrically across the opposite side of the central circular region and terminates short of the center thereof. Therefore, claims 1-5, 8, 9, 11-13 and 16-18 fail to patentably define over the Tseng reference. This action is a **final rejection** and is intended to close the prosecution of this application. Applicant's reply under 37 CFR 1.113 to this action is limited either to an appeal to the Board of Patent Appeals and Interferences or to an amendment complying with the requirements set forth below.

If applicant should desire to appeal any rejection made by the examiner, a Notice of Appeal must be filed within the period for reply identifying the rejected claim or claims appealed.

If applicant should desire to file an amendment, entry of a proposed amendment after final rejection cannot be made as a matter of right unless it merely cancels claims or complies with a formal requirement made earlier. Amendments touching the merits of the application which otherwise might not be proper may be admitted upon a showing a good and sufficient reasons why they are necessary and why they were not presented earlier.

A reply under 37 CFR 1.113 to a final rejection must include the appeal from, or cancellation of, each rejected claim. The filing of an amendment after final rejection, whether or not it is entered, does not stop the running of the statutory period for reply to the final rejection unless the examiner holds the claims to be in condition for allowance. Accordingly, if a Notice of Appeal has not been filed properly within the period for reply, or any extension of this period obtained under either 37 CFR 1.136(a) or (b), the application will become abandoned.
